SYNOPSIS OF THE MINI PROJECT

Name of the Student	Muhammed Irfan S
Batch & Roll Number	MCA S3 , FIT25MCA-2041
Contact Number & Email id	7012427332 , irfanmhdm123@gmail.com
Name of the Project Guide	Sujesh P Lal
GitHub ID	https://github.com/irfanmhdm
Project Title	ProjectVerse
Area of the Project	App Development
Date of Submission	22-07-2026
ProjectVerse is a mobile-based academic project repository designed to provide a centralized platform for students to discover, share, and manage academic projects. The system enables students to explore and search existing projects, submit project details and reports, provide GitHub repository links, and document their development experiences through a Project Story. It also incorporates a guide-validation mechanism through which faculty guides can review submitted projects, provide feedback, and approve or request modifications, thereby improving the quality and credibility of the projects maintained within the repository. A significant feature of ProjectVerse is its project similarity analysis, which compares newly proposed projects with existing projects based on their project information and report content. The system identifies related projects and helps students understand existing implementations, enabling them to introduce additional features, improvements, or innovative approaches rather than repeating previously developed ideas .	
Front End & Back End Tools	React Native, Expo, TypeScript, Firebase Authentication, Firebase Firestore, Supabase Storage, GitHub
